

INVENTORY MANAGEMENT SYSTEM (IMS)

The **GoodX** Inventory Management System (IMS) provides a comprehensive stock ordering, tracking and usage control system.

Some features include:

-  Supports the management of multiple laboratories/sites/depots
-  External purchase order generation for suppliers
-  Internal transfer order generation for intra-company stock movement
-  Barcode generation and scanning
-  Full trackability of stock batches/lots and expiry dates
-  Management of servicing of machines/equipment
-  Reagent/consumable usage logging

 Ability to set up inventory attributes including:

- Supplier and internal pack sizes
- Supplier and internal stock codes
- Tests per pack
- Preferred supplier

 Comprehensive yet simple stock takes

 Extensive reporting ability

GoodX IMS can operate as an independent stand-alone system but is also able to fully integrate into the latest version of **GoodX**.
